Screen, Urine Interpretation

See Note

INTERPRETIVE INFORMATION:

Flagging indicates a positive result; not that the result is abnormal.

Presumptive negative results for drug(s) and/or drug metabolite(s) may indicate non-compliance, inappropriate timing of specimen collection relative to drug administration, poor drug absorption, diluted/adulterated urine, or limitations of testing. The concentration at which the screening test can detect a drug or metabolite varies within a drug class.

For medical purposes only; not valid for forensic use.
