

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 10/27/2000
Sex: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 01/01/2017 12:34

Human Immunodeficiency Virus (HIV) Combo Antigen/Antibody (HIV-1/O/2) by CIA, Reflexive Panel

ARUP test code 2012674

HIV 1,2 Combo Antigen/Antibody	Reactive * (Ref Interval: Negative) The specimen was repeatedly reactive on the combined antigen/antibody screen, and therefore, is reactive for anti-HIV-1, anti-HIV-2, or p24 antigen. This is a preliminary result. Further reflexive testing is indicated. Refer to the reflexive HIV test(s) for additional detail. INTERPRETIVE INFORMATION: HIV-1,2 Combo Ag/Ab EIA, w/Reflex This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cells, Tissues, and Cellular and Tissue-Based Products (HCT/P).
--------------------------------	---

Human Immunodeficiency Virus Types 1 and 2 (HIV-1/2) Antibody Differentiation, Supplemental, with Reflex to HIV-1 Quantitative NAAT, Plasma

ARUP test code 2012669

HIV-1/2 Ab Differentiation Immunoassay	See Below INTERPRETIVE INFORMATION: HIV-1/2 Ab Diff, Supplemental This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cell, Tissues, and Cellular and Tissue-Based Products (HCT/P).
--	---

HIV-1 Antibody	Positive * (Ref Interval: Negative)
----------------	--

HIV-2 Antibody	Negative (Ref Interval: Negative)
----------------	-----------------------------------

HIV Serologic Interpretation	Pos HIV-1 Ab * HIV Serologic Interpretation HIV-1 positive The specimen is repeatedly reactive by the fourth generation, combination antigen/antibody screening assay, and positive for HIV-1 antibodies by the HIV-1/HIV-2 antibody differentiation assay. HIV-1 nucleic acid testing will not be performed on this specimen. If this positive result is inconsistent with additional testing (HIV RNA and CD4 count), testing a new specimen for HIV antibodies would be useful to rule out contamination and mislabeling.
------------------------------	--

H=High, L=Low, *=Abnormal, C=Critical
