Physician: Doctor, Example

Patient: Patient, Example

DOB: 7/5/1968
Gender: Female
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Alpha Subunit, Free, Pituitary Glycoprotein Hormones (PGH)

ARUP test code 2013034

Alpha Subunit, Pituitary Glycoproteins

2.4 ng/mL H

This test was developed and its performance characteristics determined by Labcorp. It has not been cleared or approved by the Food and Drug Administration.
Reference Range:
Perimenopausal (45-59y): <2.34
Adult serum alpha subunit (ASU) levels gradually increase with age.
As with all tumor markers, the ASU results should be assessed in conjunction with patient's medical history, clinical examination and other findings. If test results are clinically discordant, please contact the laboratory. Pregnancy is associated with very substantial physiological elevations in serum ASU levels, paralleling chorionic gonadotropin (hCG) secretion. Elevated ASU values should be interpreted in the context of pregnancy status.
Performed by: 01 Esoterix Inc
4301 Lost Hills Road
Calabasas Hills, CA 91301-5358
