## Platelet Surface Glycoprotein Expression (PGE) by Flow Cytometry, Whole Blood
ARUP test code 2013070

| | |
|---|---|
| GPIb (CD42b) Expression | Normal |

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

| | |
|---|---|
| GPIIb/IIIa (CD41/CD61) Expression | Normal |

| | |
|---|---|
| Platelet Glycoprotein Expression Interp | See Note |

No evidence of Bernard-Soulier Syndrome or Glanzmann Thrombasthenia. Expression of platelet glycoproteins Ib (CD42b) and IIb/IIIa (CD41/CD61) is normal. If suspicion of functional platelet defects remains, further testing by platelet aggregation studies is recommended.

This normal result does not exclude asymptomatic carries. If carrier state is suspected, sequence analysis is recommended.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
