ARUP test code 2013433

Clozapine, S/P, Quant	395 ng/mL	
	INTERPRETIVE INFORMATION: Clozapine and Metabolites, S/P, Quant	
	Therapeutic ranges are not well established. Clozapine is metabolized to norclozapine and clozapine-N-oxide. Clozapine concentrations between 100 and 700 ng/mL may correlate more with clinical response; however, non-responsiveness may also occur within this range. For refractory schizophrenia, clozapine concentrations greater than 350 ng/mL are suggested to achieve a therapeutic response.	
	Toxicity: Adverse effects to clozapine therapy may include tachycardia, drowsiness, hypotension, and seizures.	
	Therapeutic and toxic ranges are not well established in children.	
	See Compliance Statement B: www.aruplab.com/CS	
Norclozapine, S/P, Quant	247 ng/mL	
Clozapine-N-Oxide, S/P, Quant	<100 ng/mL
