

Client: Example Client ABC123  
123 Test Drive  
Salt Lake City, UT 84108  
UNITED STATES

Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 2/28/1939  
**Gender:** Male  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Hepatitis B Virus (HBV) Perinatal Exposure Follow-up by CIA, Panel**

ARUP test code 2014285

Hepatitis B Surface Antigen

**Positive \* (Ref Interval: Negative)**

The HBSAg screening test is strongly reactive. False positives can occur. If the result is not supported by clinical evidence, repeat testing of a new sample usually helps clarify the diagnosis. Confirmatory testing is available on request.

**INTERPRETIVE INFORMATION: Hepatitis B Surface Ag**

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cells, Tissues and Cellular and Tissue-Based Products (HCT/P).

Hepatitis B Surface Antibody

1000.00 IU/L

The anti-HBS is greater than or equal to 10 IU/L. This patient has either had an antibody response to HBV vaccination, received a transfusion, or has recovered from HBV infection. This patient should be considered immune to hepatitis B.

An anti-HBS result greater than or equal to 10 IU/L implies immunity. For post-vaccination antibody testing guidelines for the general public refer to MMWR December 23, 2005/Vol. 54(No. 16);1-23, and for healthcare workers refer to MMWR December 20, 2013/Vol. 62(No. 10);1-19.

Reference Interval: anti-HBS  
9.99 IU/L or less ..... Negative  
10.00 IU/L or greater .... Positive  
Results greater than 1,000.00 IU/L are reported as greater than 1,000.00 IU/L.

Hepatitis B Panel Interp

See Note

The result pattern of the HBSAg and anti-HBS is consistent with one of three clinical scenarios:(1) a false-positive HBSAg result in a person recently vaccinated against HBV, (2) HBV infection with passively acquired anti-HBS (transfusion with blood or FFP), or (3) early HBV infection. Depending on clinical findings, testing on a new specimen for HBSAg, anti-HBS, and anti-HBC may be useful.
