Trichinella Antibody, IgG

ARUP test code 3000005

Trichinella Antibody, IgG

POSITIVE *

REFERENCE RANGE: NEGATIVE
The Trichinella IgG ELISA employs an excretory-secretory antigen to reduce nonspecific reactivity; however, crossreactivity with other parasite antigens (e.g., strongyloides, filarial, malaria) may occur. The assay should be considered a screening test for Trichinella exposure; diagnosis of trichinosis requires a compatible patient history and supporting pathologic findings.
Performed at Quest Diagnostics Nichols Institute, 33608 Ortega Highway, San Juan Capistrano, CA 92675, Irina Maramica MD, Ph.D, Director, CLIA 05D0643352
