Physician: Doctor, Example

Patient: Patient, Example
DOB8/8/1961
Gender:Female
Patient Identifiers:01234567890ABCD, 012345
Visit Number (FIN):01234567890ABCD
Collection Date:00/00/0000 00:00

Coccidioides Antibodies by Complement Fixation, CSF
ARUP test code 3000059

Coccidioides Ab by CF, CSF	<1:2	(Ref Interval: <1:2)
	INTERPRETIVE INFORMATION: Coccidioides Ab by Complement Fixation (CF)	
	Any titer suggests past or current infection. However, greater than 30 percent of cases with chronic residual pulmonary disease have negative Complement Fixation (CF) tests. Titers of less than 1:32 (even as low as 1:2) may indicate past infection or self-limited disease; anticoccidioidal CF antibody titers in excess of 1:16 may indicate disseminated infection. CF serology may be used to follow therapy. Antibody in CSF is considered diagnostic for coccidioidal meningitis, although 10 percent of patients with coccidioidal meningitis will not have antibody in CSF.	
	This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
