

Patient:	Client:	ARUP Test Code: 3000147
DOB: Age: Gender: F		
Patient Identifiers:	Physician:	Collection Date: 04/29/2021 Received in Lab: 06/02/2021 Completion Date: 06/03/2021
Visit Number (FIN):		

This is an interim report for an integrated screening test panel. The first sample was processed and all required first trimester information has been received. The MoMs, risks, and screening results will be reported after we receive and process the second trimester sample.

Second trimester serum markers are needed to provide a final interpretation. The ideal time to draw the second sample is between 16 and 18 weeks gestation. For this patient, ideally collect between 05-21-21 and 06-04-21. However, the sample may be drawn as early as 05-07-21 or as late as 07-22-21 and still provide valid information.

Gestational Age Comment:

Section 79-1 of New York State Civil Rights Law requires informed consent be obtained from patients (or their legal guardians) prior to pursuing genetic testing. These forms must be kept on file by the ordering physician. Consent forms for genetic testing are available at www.aruplab.com. Incidental findings are not reported unless clinically significant but are available upon request.

PAPP-A Maternal Compliance Statement: This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Maternal Screen Interpretation Compliance Statement: This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

Patient Information Used in Risk Calculations:		Marker	Measurement
Maternal Age at Delivery:	23.0 yr	PAPP-A	2274.1 ng/mL
Maternal Weight:	150.0 lbs.	NT	1.00 mm
Estimated Due Date:	11-05-21		
Gestational Age at Draw:	12 wks, 6 days		
Number of Fetuses:	Singleton		

Patient: ARUP Accession: 21-119-154373

Maternal Serum Screening, Integrated, Specimen #1, PAPP-A, NT

Patient: | Date of Birth: | Gender: F | Physician:
Patient Identifiers: | Visit Number (FIN):

Maternal Race: Nonblack
Current Smoker: No
Family History of Aneuploidy: No
Specimen: Initial sample
Crown Rump Length: 67.5 mm
Crown Rump Length (Twin B): Not Applicable
Sonographer Certification #: Unknown_number
Sonographer Name: Unknown, Sonog
Ultrasound Date: 04-29-21
Best Date to Draw Sample #2 By: 06-04-21
