Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 7/27/2023  
**Gender:** Male  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Marijuana Metabolite, Umbilical Cord Tissue, Qualitative**

ARUP test code 3000256

THC-COOH, Cord, Qual

Not Detected ng/g (Ref Interval: Cutoff 0.2)

INTERPRETIVE INFORMATION: Marijuana Metabolite, Umbilical  
Cord Tissue, Qualitative

Methodology: Qualitative Liquid Chromatography-Tandem Mass  
Spectrometry

This test is designed to detect and document exposure that occurred during approximately the last trimester of a full term pregnancy, to a common cannabis (marijuana) metabolite. Alternative testing is available to detect other drug exposures. The pattern and frequency of drug(s) used by the mother cannot be determined by this test. A negative result does not exclude the possibility that a mother used drugs during pregnancy. Detection of drugs in umbilical cord tissue depends on extent of maternal drug use, as well as drug stability, unique characteristics of drug deposition in umbilical cord tissue, and the performance of the analytical method. Drugs administered during labor and delivery may be detected. Detection of drugs in umbilical cord tissue does not insinuate impairment and may not affect outcomes for the infant. Interpretive questions should be directed to the laboratory.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
