**Toxocara Antibody by ELISA**

ARUP test code 3000472

Toxocara Antibody by ELISA

**POSITIVE \***

REFERENCE RANGE: NEGATIVE  
Results of this assay must be interpreted with caution, as broad variations in antibody response occur, and levels may remain elevated for years after infection. Further, antibodies induced by other parasitic infections, such as Strongyloides and Cysticercus, may cross-react in this assay. Although a negative result usually rules out infection with Toxocara spp., repeat testing may be clinically warranted in early infection.
