

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 7/14/1958
Gender: Female
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

PanFungal Identification by Sequencing

ARUP test code 3000496

PanFungal Identification by Sequencing

Not Detected

The result of Panfungal Identification by Sequencing testing is Not Detected. Fungal DNA sequences were not definitively detected in this specimen.

Potential causes of not detected results include: PCR inhibitors in the specimen, low levels of fungal DNA, and/or mixtures of different fungal sequences.

INTERPRETIVE INFORMATION: PanFungal Identification by Sequencing

This assay detects and identifies human fungal pathogens by Sanger sequencing. This assay cannot differentiate invasive fungal infection from environmental fungal DNA. Clinical correlation of sequencing result is recommended.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
