Physician: Doctor, Example

Patient: Patient, Example

DOB	5/21/1940	
Gender:	Male	
Patient Identifiers:	01234567890ABCD, 012345	
Visit Number (FIN):	01234567890ABCD	
Collection Date:	00/00/0000 00:00	

IRF4/DUSP22 (6p25) Gene Rearrangement by FISH

ARUP test code 3001568

IRF4 FISH Result	Negative	
	Controls were run and performed as expected. This result has been reviewed and approved by M.D, Ph.D.	
Total Cell Count	691	
Scoring Method	Computer Assisted	
IRF4 FISH Reference Number	BS22-214 A5	
IRF4 FISH Source	R Axillary LN	

H=High, L=Low, *=Abnormal, C=Critical

Unless otherwise indicated, testing performed at:

INTERPRETIVE INFORMATION: IRF4/DUSP22 (6p25), FISH

IRF4/DUSP22 fluorescence in situ hybridization (FISH) analysis is designed to detect 6p25 (IRF4/DUSP22) translocations regardless of rearrangement partners. Differentially labelled probes targeting the upstream (5') and downstream (3') flanking regions of the IRF4/DUSP22 gene were used (Kreatech).

A result of 12 percent or more of the cells evaluated showing an abnormal signal pattern is considered positive. Some signal patterns other than the classic abnormal pattern may also be present and may be considered abnormal. Based on the assay performance during test validation, the test is expected to detect 100 percent of IRF4 rearrangements in patients with IRF4-rearranged lymphomas, except for rare instances of cryptic rearrangements. Assay range and limit of detection were generated using normal and known positive cases respectively.

IRF4/DUSP22 rearrangements can be found in both B-cell and T-cell non-Hodgkin lymphomas. Results should be correlated with clinical, morphologic, and immunophenotypic data.

Fluorescence in situ hybridization (FISH) analysis was performed on a section from a paraffin-embedded tissue block. The area(s) for analysis were selected by histopathologic review of a matching hematoxylin- and eosin-stained section.

Controls performed appropriately.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
