**Collection Date:** 00/00/0000 00:00

**Ova and Parasite Exam, Fecal (Immunocompromised or Travel History)**

ARUP test code 3001662

Ova and Parasite, Fecal Interpretation

Negative (Ref Interval: Negative)

INTERPRETIVE INFORMATION: Ova and Parasite, Fecal

Method for identification of Ova and Parasites includes wet mount and trichrome stains.

Due to the various shedding cycles of many parasites, three separate stool specimens collected over a 5-7-day period are recommended for ova and parasite examination. A single negative result does not rule out the possibility of a parasitic infection. The ova and parasite exam does not specifically detect Cryptosporidium, Cyclospora, Cystoisospora, and Microsporidia. For additional test information refer to ARUP consult, <https://arupconsult.com/content/diarrhea>
