**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Krebs von den Lungen-6**

ARUP test code 3001866

Krebs von den Lungen-6

373 U/mL (Ref Interval: 0-500)

INTERPRETIVE INFORMATION: Krebs von den Lungen 6

Krebs von den Lungen-6 (KL-6) may be an indicator of lung inflammation or damage. Elevated levels are associated with various types of interstitial lung diseases (ILD).

Abnormal KL-6 results should be interpreted in the appropriate clinical context. A negative result does not rule out ILD.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
