**Krebs von den Lungen-6**  
ARUP test code 3001866

Krebs von den Lungen-6  
>40000 U/mL   H   (Ref Interval: 0-500)

Specimens with results greater than 10,000 U/mL will be diluted to the maximum reportable range (>40,000 U/mL).

**INTERPRETIVE INFORMATION: Krebs von den Lungen 6**

Krebs von den Lungen-6 (KL-6) is a non-specific indicator of lung inflammation or damage. Elevated levels are associated with various types of interstitial lung diseases (ILD).

Abnormal KL-6 results should be interpreted in the appropriate clinical context. A negative result does not rule out ILD.

See Compliance Statement D: www.aruplab.com/CS
