21-Hydroxylase Autoantibodies, Serum

ARUP test code 3001962

21-Hydroxylase Autoantibody

Positive *

INTERPRETIVE INFORMATION: 21-Hydroxylase Autoantibodies, Serum
The 21-Hydroxylase Autoantibody assay is intended for the qualitative determination of autoantibodies to steroid 21-hydroxylase in human serum. A positive result is indicative of primary adrenal insufficiency (Addison disease). Results should be interpreted within the context of clinical symptoms, including functional adrenal testing. Males with adrenal insufficiency and negative results for 21-hydroxylase autoantibodies should be screened for X-Linked Adrenoleukodystrophy (X-ALD) by ordering Very Long-Chain Branched Fatty Acids in Plasma (ARUP Test Code 2004250).
