Complement Activity Total, (CH50)

ARUP test code 3002575

Complement Activity, Total Turbidimetric **38.6 U/mL L (Ref Interval: 38.7-89.9)**

If low CH50 value is unexpected or does not correlate with the patient's clinical condition, repeat analysis with a fresh frozen serum specimen is suggested for verification.
*****EFFECTIVE 05/18/2020*****
PATIENT RE-BASELINING

ARUP has validated a new assay for measuring Total Complement Activity (CH50). If the patient is being monitored for total complement activity to determine treatment response, and the prior sample was tested up to 30 days before 05/18/2020, ARUP will offer re-baselining free of charge. If this is an initial CH50 result for diagnosis, re-baselining is not needed.
