Patient: Patient, Example

DOB: 1/5/2014
Gender: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

Hemoglobin F with Reflex to Electrophoresis

ARUP test code 3002645

Hemoglobin F **37.9 % H** (Ref Interval: 0.0-2.1)

Increased levels of Hb F can be seen in both acquired and inherited conditions. Acquired causes include pregnancy, megaloblastic anemia, hematological neoplasms, aplastic anemia, paroxysmal nocturnal hemoglobinuria, hyperthyroidism, and certain drugs (e.g., hydroxyurea). Inherited conditions include hereditary persistence of fetal hemoglobin and beta thalassemia. Please correlate clinically.

Abnormal hemoglobin present. For further clarification, Hemoglobin Evaluation with Reflex to Electrophoresis and/or RBC Solubility (ARUP test 3017101) or Hemoglobin Evaluation Reflexive Cascade (ARUP test 2005792) is suggested.

REFERENCE INTERVAL: Hemoglobin F

Access complete set of age- and/or gender-specific reference intervals for this test in the ARUP Laboratory Test Directory (aruplab.com).
