

Client: Example Client ABC123  
123 Test Drive  
Salt Lake City, UT 84108  
UNITED STATES

Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 3/6/1975  
**Gender:** Male  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Coccidioides Antibodies by Complement Fixation and Immunodiffusion, Serum**

ARUP test code 3002995

**Coccidioides Antibody by CF** <1:2 (Ref Interval: <1:2)  
**INTERPRETIVE INFORMATION:** Coccidioides Ab by Complement Fixation (CF)  
 Any titer suggests past or current infection. However, greater than 30 percent of cases with chronic residual pulmonary disease have negative Complement Fixation (CF) tests. Titers of less than 1:32 (even as low as 1:2) may indicate past infection or self-limited disease; anticoccidioidal CF antibody titers in excess of 1:16 may indicate disseminated infection. CF serology may be used to follow therapy. Antibody in CSF is considered diagnostic for coccidioidal meningitis, although 10 percent of patients with coccidioidal meningitis will not have antibody in CSF.

**Coccidioides by Immunodiffusion, Serum** Not Detected (Ref Interval: Not Detected)  
 No Coccidioides antibodies (ie, IDTP, IDCF) were detected. This result does not exclude Coccidioides infection.
