**Circulating Immune Complex, C3 fragments**

ARUP test code 3004431

Circulating Immune Complex, C3 fragments	4 ug Eq/mL	(Ref Interval: <=15)
	INTERPRETIVE INFORMATION: Circulating Immune Complex, C3 fragments	
	Many autoimmune disorders, chronic infections and malignancies are associated with circulating immune complexes. Quantitation of immune complexes assists in staging immunologic disorders. Detection of circulating immune complexes is not essential to any specific diagnosis. Circulating immune complexes may be found without any evident pathology and positive results do not necessarily implicate immune complex-related disease process. Values between 15 and 20 ug Eq/mL are considered equivocal for Circulating Immune Complex, C3 fragments assay. Repeat- testing using a new specimen is recommended, if clinically indicated.
