**BK Virus by Quantitative NAAT, Urine**

ARUP test code 3006075

BK Qnt by NAAT, Urine IU/mL Not Detected

BK Qnt by NAAT, Urine log IU/mL Not Detected

BK Qnt by NAAT, Urine Interp Not Detected (Ref Interval: Not Detected)

INTERPRETIVE INFORMATION: BK Virus by Quantitative NAAT, Urine  
The quantitative range of this assay is 2.30 - 8.00 log IU/mL (200 - 100,000,000 IU/mL).

An interpretation of "Not Detected" does not rule out the presence of inhibitors or BKV DNA concentration below the level of detection of the assay. Care should be taken in the interpretation of any single viral load determination.

International standardization has improved comparability of assay results across laboratories, but discrepancies still exist due to commutability issues with the standard.
