123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: Unknown
Gender: Unknown
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

BK Virus by Quantitative NAAT, Plasma

ARUP test code 3006076

BK Qnt by NAAT, Plasma IU/mL 189 IU/mL

One IU/mL of BK DNA measured by the current quantitative PCR assay is approximately equal to 1.37 copies/mL reported by the previous ARUP laboratory-developed test. This conversion factor between IU/mL and copies/mL was established during verification of the current assay.

BK Qnt by NAAT, Plasma log IU/mL 2.28 log IU/mL

BK Qnt by NAAT, Plasma Interp

Detected * (Ref Interval: Not Detected)

INTERPRETIVE INFORMATION: BK Virus by Quantitative NAAT, Plasma
The quantitative range of this assay is 1.33 - 8.00 log IU/mL (21.5 - 100,000,000 IU/mL)

An interpretation of "Not Detected" does not rule out the presence of inhibitors or BKV DNA concentration below the level of detection of the assay. Care should be taken in the interpretation of any single viral load determination.

International standardization has improved comparability of assay results across laboratories, but discrepancies still exist due to commutability issues with the standard.

H=High, L=Low, *=Abnormal, C=Critical

VERIFIED/REPORTED DATES

Procedure	Accession	Collected	Received	Verified/Reported
