**Collection Date:** 00/00/0000 00:00

**Muscle-Specific Kinase (MuSK) Antibody, IgG by CBA-IFA with Reflex to Titer, Serum**

ARUP test code 3006198

MuSK Ab IgG CBA IFA Screen, Serum

<1:10

(Ref Interval: <1:10)

MuSK Antibody, IgG is not detected. No further testing will be performed.

INTERPRETIVE INFORMATION: MuSK IgG Ab CBA, Serum, with Rflx

Muscle-specific kinase (MuSK) antibody is found in a subset of patients with myasthenia gravis, primarily those seronegative for muscle acetylcholine receptor (AChR) antibody. Decreasing antibody levels may be associated with therapeutic response; therefore, clinical correlation must be strongly considered. A negative test result does not rule out a diagnosis of myasthenia gravis.

This indirect fluorescent antibody cell-based assay (CBA) utilizes muscle-specific kinase (MuSK) transfected cells for the detection of the MuSK IgG antibody.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA-certified laboratory and is intended for clinical purposes.
