ARUP test code 3006379

Hepatitis Delta Antibody by ELISA

Equivocal * (Ref Interval: Negative)
The anti-HDV result is borderline and is therefore inconclusive. Retesting at one week intervals will help distinguish between (1) a rising or falling antibody titer or (2) a false positive. The Hepatitis D by Quantitative PCR test is not indicated and therefore not performed. Order anti-HDV testing only when Hepatitis B virus infection has been confirmed.

INTERPRETIVE INFORMATION: Hepatitis Delta Antibody by ELISA
This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the U.S. Food and Drug Administration. This test was performed in a CLIA-Certified laboratory and is intended for clinical purposes.
