Physician: Doctor, Example

**Patient: Patient, Example**

**DOB:** 12/31/2000  
**Gender:** Female  
**Patient Identifiers:** 01234567890ABCD, 012345  
**Visit Number (FIN):** 01234567890ABCD  
**Collection Date:** 00/00/0000 00:00

**Prolonged Clot Time Reflexive Profile**

ARUP test code 3006383

Prolonged Clot Time Reflex Panel Interp

See Note

Our initial testing did not identify a prolonged clotting time (normal PT, aPTT, and DRVVT); the D-dimer is not elevated and fibrinogen is normal. Therefore, no additional reflex testing was performed as a part of the Prolonged Clotting Time Reflexive Panel.

If a prolonged clotting time (e.g. PT or aPTT) was identified locally, this could represent specimen differences as well as differences in local reagents or reference intervals.

No clinical history was provided with the test request, which limits the interpretation. Close clinical correlation is recommended. If there is a bleeding history, note that some bleeding disorders are not associated with prolonged clotting times.

Interpreted by [REDACTED]

INTERPRETIVE INFORMATION: Prolonged Clot Time Reflex Panel

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.

**Fibrinogen**

ARUP test code 0030130

Fibrinogen	345 mg/dL	(Ref Interval: 150-430)
------------	-----------	-------------------------

**D-Dimer**

ARUP test code 0030057

D-Dimer	0.3 ug/mL	(Ref Interval: 0.0-0.4)
---------	-----------	-------------------------

**H=High, L=Low, \*=Abnormal, C=Critical**

INTERPRETIVE INFORMATION: D-Dimer  
The presence of rheumatoid factor may lead to false positive results with the D-Dimer test. This test should not be used to rule out venous thromboembolism.

Maximum values less than 10 ug/mL FEU are rarely indicative of DIC.  
Results are reported in Fibrinogen Equivalent Units (FEU).

**Lupus Anticoagulant Reflexive Panel**

ARUP test code 0030181

Prothrombin Time	12.1 sec	(Ref Interval: 12.0-15.5)
dRVVT Screen	<b>23 sec L</b>	<b>(Ref Interval: 33-44)</b>
dRVVT 1:1 Mix	Not Applicable sec	(Ref Interval: 33-44)
dRVVT Confirmation	Not Applicable ratio	(Ref Interval: Negative)
PTT-LA Screen (PTT-D)	42 sec	(Ref Interval: 32-48)
Thrombin Time	Not Applicable sec	(Ref Interval: 14.7-19.5)
Reptilase Time	Not Applicable sec	(Ref Interval: <=21.9)
PTT-D Heparin Neutralized	Not Applicable sec	(Ref Interval: 32-48)
PTT-D 1:1 Mix	Not Applicable sec	(Ref Interval: 32-48)
Platelet Neutralization (PTT-D, Confirm)	Not Applicable	(Ref Interval: Negative)
Hexagonal Phospholipid Neutral Reflex	Not Applicable	(Ref Interval: Negative)
Lupus Anticoagulant Interpretation	See Note	

**H=High, L=Low, \*=Abnormal, C=Critical**

Unless otherwise indicated, testing performed at:

Lupus anticoagulant not detected.  
The phospholipid-dependent screening tests (PTT, DRVVT) are not prolonged.

Lupus anticoagulant antibodies are heterogeneous and antibody titers fluctuate over time. Laboratory tests used to identify lupus anticoagulants demonstrate variable sensitivity. If there is strong clinical suspicion for antiphospholipid antibody syndrome (APS), consider testing for cardiolipin and beta-2 glycoprotein 1 antibodies (IgG and IgM) if this testing has not already been performed.
