INTERPRETIVE INFORMATION: Pneumonia panel by PCR

The Pneumonia panel is not intended to replace respiratory culture, blood cultures, or urine antigen testing. Only the most common causes of pneumonia are detected and a paired respiratory culture is required for all Pneumonia Panel PCR tests. Fungal pathogens are not tested by the Pneumonia Panel. Bacterial semi-quantitative values by PCR may not directly correlate with culture. Bacteria may grow in culture in very low quantities that will not be reported by the PCR due to a cut-off threshold applied to the reporting algorithm. SARS-CoV-2 (COVID-19) is not detected by this panel.

**H=High, L=Low, \*=Abnormal, C=Critical**
