

Client: Example Client ABC123
123 Test Drive
Salt Lake City, UT 84108
UNITED STATES

Physician: Doctor, Example

Patient: Patient, Example

DOB: 1/5/1997
Gender: Male
Patient Identifiers: 01234567890ABCD, 012345
Visit Number (FIN): 01234567890ABCD
Collection Date: 00/00/0000 00:00

HBV Prenatal Triple Panel

ARUP test code 3018943

Hepatitis B Core Antibodies, Total

Positive * (Ref Interval: Negative)

The anti-HBc is reactive, which is consistent with recent or remote HBV infection. False positive anti-HBc results are not uncommon.

INTERPRETIVE INFORMATION: Hepatitis B Core Ab (Total)

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cells, Tissues and Cellular and Tissue-Based Products (HCT/P).

Hepatitis B Surface Antibody

25.00 IU/L

The anti-HBs is greater than or equal to 10 IU/L. This patient has either had an antibody response to HBV vaccination, received a transfusion, or has recovered from HBV infection. This patient should be considered immune to hepatitis B.

An anti-HBs result greater than or equal to 10 IU/L indicates immunity.

Reference Interval: anti-HBs
9.99 IU/L or less Negative
10.00 IU/L or greater ... Positive
Results greater than 1,000.00 IU/L are reported as greater than 1,000.00 IU/L.

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cell, Tissues and Cellular and Tissue-Based Products (HCT/P).

Hepatitis B Surface Antigen, Prenatal

See Confirm (Ref Interval: Negative)

The HBSAg screening test is strongly reactive. Refer to HBSAg Confirmation test for additional detail.

INTERPRETIVE INFORMATION: Hepatitis B Virus Surface Antigen with Reflex to Confirmation, Prenatal

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cell, Tissues and Cellular and Tissue-Based Products (HCT/P).

H=High, L=Low, *=Abnormal, C=Critical

Hepatitis B Virus Surface Antigen Confirmation, Prenatal

ARUP test code 2007575

Hepatitis B Surface Ag Confirm, Prenatal

Positive * (Ref Interval: Non Confirmed)

Hepatitis B surface antigen (HBsAg) did neutralize using anti-HBs. This specimen is therefore POSITIVE for HBsAg. False positives can occur. If the result is not supported by clinical evidence, repeat testing of a new sample usually helps clarify the diagnosis.

INTERPRETIVE INFORMATION: Hepatitis B Virus Surface Antigen Confirmation, Prenatal

This assay should not be used for blood donor screening, associated re-entry protocols, or for screening Human Cell, Tissues and Cellular and Tissue-Based Products (HCT/P).
