Test Name	In Range	Out of Range	Reference Range	Cut Off Value
LINEZOLID	5.68			UG/ML

The relatively new target antibiotic in the reported assay is commonly applied for treatment of drug-resistant pathogens and nosocomial infections. In the absence of objective proficiency tests, laboratory comparison programs and specific independent challenge sets that are commonly available, the results herein are provided for submitting agency use in clinical investigations and other research evaluations of overall program efficacy. While good laboratory practice is always employed in all tests conducted, no specific clinical judgment based on laboratory results appears to be appropriate at this time. The test/panel listed above was developed and its analytical performance characteristics have been determined by Atlantic Diagnostics Laboratory. It has not been cleared or approved by the FDA. The laboratory is regulated under CLIA as qualified to perform high-complexity testing. This test(s) is used for clinical purposes. It should not be regarded as investigational or for research.
