

HOTLINE: Effective November 15, 2021

0094030 Felbamate

FELBAMA

Reference Interval: Effective November 15, 2021

Therapeutic Range	30-60 µg/mL
Toxic Level	Greater than or equal to 100 µg/mL

Interpretive Data:

Felbamate is indicated for treatment of epilepsy. The therapeutic range is based on serum, predose (trough) draw collection at steady-state concentration. Patient pharmacokinetics may be variable due to age, comedications, and/or compromised renal function. Adverse effects may include nausea, vomiting, dizziness, blurred vision, and ataxia. Felbamate use may increase the incidence of liver failure and aplastic anemia.

This test was developed and its performance characteristics determined by ARUP Laboratories. It has not been cleared or approved by the US Food and Drug Administration. This test was performed in a CLIA certified laboratory and is intended for clinical purposes.
