# TEST CHANGE

## Antimicrobial Susceptibility - Carbapenemase Gene Detection by PCR

**2014277, CARBAR PCR**

### Specimen Requirements:

<table>
<thead>
<tr>
<th>Patient Preparation:</th>
<th>Collect: Actively growing Enterobacteriaceae, Pseudomonas aeruginosa, or Acinetobacter baumannii in pure culture.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specimen Preparation:</td>
<td>Transport sealed container with pure culture on agar slant/bacterial transport media. Place each specimen in an individually sealed bag.</td>
</tr>
<tr>
<td>Transport Temperature:</td>
<td>Room temperature.</td>
</tr>
<tr>
<td>Unacceptable Conditions:</td>
<td>Mixed cultures or nonviable organisms.</td>
</tr>
<tr>
<td>Remarks:</td>
<td>Isolate identification (for cultures) and specimen source required.</td>
</tr>
<tr>
<td>Stability:</td>
<td>Ambient: 1 week; Refrigerated: 1 week; Frozen: Unacceptable</td>
</tr>
</tbody>
</table>

### Methodology:

Qualitative Polymerase Chain Reaction (PCR)

### Performed:

Sun-Sat

### Reported:

1-2-3 days

### Note:

An additional processing fee will be billed for all isolates not submitted in pure culture, as indicated in the specimen requirements. If species identification is not provided, identification will be performed at ARUP. Additional charges apply. This assay will generate a negative IMP result when testing samples containing IMP-7, IMP-13 or IMP-14 gene sequences, and may detect IMP-4 at reduced sensitivity.

### CPT Codes:

87150

### New York DOH Approval Status:

This test is New York DOH approved.

### Interpretive Data:

This assay detects five carbapenemase gene families (*blaKPC, blaNDM, blaOXA-48, blaVIM, blaIMP*) encoding enzymes that may confer resistance to carbapenem and other beta-lactam antibiotics. This assay is intended for use as an aid to infection control in the detection of carbapenem-resistant bacteria and is not intended to guide or monitor treatment of infection. A negative result does not exclude the presence of other resistance mechanisms or assay-specific nucleic acid in
concentrations below the level of detection.

Reference Interval:

Not Detected
